UF Information Technology

Internship Title: Test Automation Internship
Department: Applications Development and Integration
Work Location: 800 SW 2nd Avenue, Gainesville FL 32697

Brief Description of Internship:

This internship position will work closely with IT Analysts on the UFIT Quality team to understand current testing practices, manual and automated testing, and release management.

Specific Duties:

- Convert/recreate recorded regression tests from Katalon to UFT One
- Attempt to automate JMeter load test run and result reporting
- Assist the team with manual testing as needed

Hours Per Week: 10 - 20 hours per week

Qualifications Needed:

- Inquisitive nature with desire to learn new things
- Information Technology or Computer Science educational background
- Desire to work with others to accomplish results and solve problems

Learning Objectives:

- Read various types of use case, requirement, feature, user story
- Understand testing strategy and approach, report defects for rework
- Identify opportunities to build automated test vs manual test
- Demonstrate openness, inclusiveness, sensitivity, and the ability to interact respectfully with all people and understand individuals' differences in order to design and manage testing to ensure functionality meets project requirements
- Learn, assess, and implement quality in project deliverables
- Develop interpersonal skills which will enable them to build professional relationships, work within a team structure, and to manage conflict in the workplace
